Week 3 print and bring

Robot dance studio

Print for this session

[ ] 5 copies: W03_dance_Team_Sheet.pdf — 4 team sheets + 1 spare; share one sheet per team.

[ ] 4 copies: W03_dance_Build_Card.pdf — 1 per team; one page each.

[ ] 1 copies: Attendance.pdf — 12 rows, one class record.

[ ] 1 copies: W03_dance_Checklist.pdf — lead packing checklist; optional if checked digitally.

Required student/record sheets: 10 pages. Packing checklist and lead notes are optional. Week 1 also needs 4 role-card sheets and 2 hub-guide sheets. Reuse these later.

Bring the reusable kit

[ ] Use Reusable_Kit.md. Pack 14 pencils, 14 erasers, 4 rulers, 4 team trays/build packs, 4 laptops/chargers, 2 robot kits, 2 timers and tested cables.

This week’s additional supplies

[ ] 6 character blanks and 12 arm strips: 4 teams + 2 mentor examples.

[ ] 6 simple hinges or axle assemblies; use tape hinges if parts are limited.

[ ] 2 clear dance areas, sized after rehearsing the complete routine.

Before children arrive

[ ] Open the Week 3 slide PDF/PPTX, speaker notes, complete W03_dance.py and build references. Save offline copies.

[ ] Run the week’s robot sequence on BOTH bases; confirm intended hub, ports, stop controls and save workflow.

[ ] Open W03_dance.py. Test a small pivot of 90 wheel degrees before class. Use low speed and a clear perimeter. The turn helper is an open-loop pivot, not a command for a 90-degree heading change. Prepare two mentor examples and four labeled team build packs. Rehearse attachment clearance, a hand test and a quick swap. Show the hub color guide.
