Week 4 print and bring

Parking assistant

Print for this session

[ ] 5 copies: W04_parking_Team_Sheet.pdf — 4 team sheets + 1 spare; share one sheet per team.

[ ] 4 copies: W04_parking_Build_Card.pdf — 1 per team; one page each.

[ ] 1 copies: Attendance.pdf — 12 rows, one class record.

[ ] 1 copies: W04_parking_Checklist.pdf — lead packing checklist; optional if checked digitally.

Required student/record sheets: 10 pages. Packing checklist and lead notes are optional. Week 1 also needs 4 role-card sheets and 2 hub-guide sheets. Reuse these later.

Bring the reusable kit

[ ] Use Reusable_Kit.md. Pack 14 pencils, 14 erasers, 4 rulers, 4 team trays/build packs, 4 laptops/chargers, 2 robot kits, 2 timers and tested cables.

This week’s additional supplies

[ ] 6 broad flat wall panels, 12 brace strips and 6 floor panels.

[ ] 2 distance sensors mounted on C, one per robot.

[ ] 4 footprint proxies, one per team; 2 mentor garages ready before class.

Before children arrive

[ ] Open the Week 4 slide PDF/PPTX, speaker notes, complete W04_parking.py and build references. Save offline copies.

[ ] Run the week’s robot sequence on BOTH bases; confirm intended hub, ports, stop controls and save workflow.

[ ] Mount the distance sensor before class. Open W04_parking.py. At 100, 150, and 250 mm, check readings against the ruler. Start about 300 mm from a broad, upright wall. Keep hands out of the lane. Prepare two mentor examples and four labeled team build packs. Rehearse attachment clearance, a hand test and a quick swap. Show the hub color guide.
