Week 7 print and bring

Community robot mission

Print for this session

[ ] 5 copies: W07_mission_Team_Sheet.pdf — 4 team sheets + 1 spare; share one sheet per team.

[ ] 4 copies: W07_mission_Build_Card.pdf — 1 per team; one page each.

[ ] 1 copies: Attendance.pdf — 12 rows, one class record.

[ ] 1 copies: W07_mission_Checklist.pdf — lead packing checklist; optional if checked digitally.

Required student/record sheets: 10 pages. Packing checklist and lead notes are optional. Week 1 also needs 4 role-card sheets and 2 hub-guide sheets. Reuse these later.

Bring the reusable kit

[ ] Use Reusable_Kit.md. Pack 14 pencils, 14 erasers, 4 rulers, 4 team trays/build packs, 4 laptops/chargers, 2 robot kits, 2 timers and tested cables.

This week’s additional supplies

[ ] 4 saved team attachments or scenes and 2 mentor example courses.

[ ] 8 spare card panels for four team scene improvements.

[ ] 6 lightweight cubes and 2 wall/marker courses matching the chosen missions.

Before children arrive

[ ] Open the Week 7 slide PDF/PPTX, speaker notes, complete W07_mission.py and build references. Save offline copies.

[ ] Run the week’s robot sequence on BOTH bases; confirm intended hub, ports, stop controls and save workflow.

[ ] Keep the same base and ports. Offer two core routes: supply delivery to a marker or careful parking near a shelf. Open W07_mission.py. Reserve a marked 100 × 100 cm area per kit. Each team gets its own saved recipe. Prepare two mentor examples and four labeled team build packs. Rehearse attachment clearance, a hand test and a quick swap. Show the hub color guide.
