Week 1 build card

A removable robot mascot

Team ____ A ____ B ____ C ____

Make a name flag or face that stays upright and attaches without covering a wheel, port, button or cable.

Materials: Small Technic beams and pins, pre-cut card, crayons, removable tape and a mentor-made mounting template.

Try it

1. Choose a team name and lay out a lightweight mast or face.

2. Build a wide or braced support using the mounting template.

3. Gently tilt and tap the model by hand. Improve one weak connection.

Our jobs

Builder connects. Designer chooses parts and checks the plan. Tester hand-tests and describes the result. Everyone builds. Rotate when the mentor calls time.

Test and improve

Stands after a gentle tap; stays inside the clearance template; no loose parts.

We noticed _____. We changed _____.

Fit the approved mascot to the stopped base for the retest. The first robot teams use a mentor example or the bare base.

Fit only to a stopped robot after the mentor checks clearance. Leave wheels, buttons, cables and sensors clear.
