Week 8 build card

A working exhibit for the showcase

Team ____ A ____ B ____ C ____

Finish a stable exhibit that helps visitors understand the team’s robot job.

Materials: The saved team build and program, a small card sign, pre-cut card, tape and spare repair parts.

Try it

1. Repair or strengthen one loose part of the saved build.

2. Add a small sign or model showing the user and useful job.

3. Rehearse three short speaking parts while the robot is with the other team.

Our jobs

Builder connects. Designer chooses parts and checks the plan. Tester hand-tests and describes the result. Everyone builds. Rotate when the mentor calls time.

Test and improve

Exhibit stands, robot lane stays clear, and each child can explain one part.

We noticed _____. We changed _____.

This is finishing and presentation time, not a new complex mechanism. Each team gets a six-minute robot rehearsal and a four-minute demonstration.

Fit only to a stopped robot after the mentor checks clearance. Leave wheels, buttons, cables and sensors clear.
