Robotics at the YMCA

Eight robotics sessions for 12 children in grades 5 and 6

Fall 2026 · Planning draft

The confirmed class format

12 children in four teams of three

2 SPIKE Prime kits and 4 available laptops

8 weekly meetings of 60 minutes

4–6 student instructors, plus an adult lead

A new mission each week

Weeks 1–2	A robot mascot and a useful cargo tray
Weeks 3–4	A dancing character and a garage
Weeks 5–6	A marker road and a rescue guide
Weeks 7–8	A community scene and working exhibit

A small recipe controls the robot

```
travel = 180
await drive(travel)
await signal("D")
```

Predict. Change one value. Run. Explain the result.

Preparation before the first class

Confirm eight dates and test the available devices.

Inspect both kits and rehearse every mission.

Confirm supervision, pickup, storage, and charging.

Agree how the YMCA and team will evaluate the pilot.

Learning and community benefit

Each student explains a program decision.

Each team improves a design using test evidence.

High school mentors practice teaching and leadership.

The YMCA helps decide whether the program should repeat.
